“How to take Misoprostol”

TAKE IBUBRUFEN 600MGS BEFORE TAKING YOUR MISOPROSTOL

Your doctor has given you 2 tablets of Misoprostol 400mcg to take home.

This medication is to be used no earlier than 24 hours (but between 24 and 48 hours later) after taking the Mifepristone at the Doctor’s surgery.

It needs to be absorbed quickly by the following route:

1. Wet your mouth with water
2. Place 1 tablet on each side of your mouth between gums and cheek as illustrated below:

3. Don’t drink, smoke or eat for the next 30 minutes (set phone alarm for timing).
4. After 30 minutes, drink some water and swallow the remains of the medication.
5. There is no cause for concern if you vomit after this time.
6. A third tablet should be used 4 hours later if no bleeding has occurred.
